

FACES

Program Summary

Family AIDS Care and Education Services (FACES) is a family-focused, comprehensive HIV prevention, care, and treatment program with 63 supported HIV sites, 61 in Nyanza Province and two in Nairobi; 59 PMTCT sites in Nyanza; and 4 male circumcision sites in Migori and Rongo in Nyanza Province. FACES initially launched with one HIV site in Nairobi in September 2004 and second site in Kisumu in March 2005.

HIV care and treatment

FACES supports 63 HIV service sites in Western Kenya and Nairobi

- 61 sites in Nyanza Province, Western Kenya and 2 in Nairobi.
- A summary of enrollment and sites per district is below in Table 1.

Table 1: Current Enrollment by District (as of 31 March 2009)

Cumulative HIV Care				Cumulative ART			
	Adults	Peds	Total		Adults	Peds	Total
Nairobi (2 sites)	4066	360	4426	Nairobi (2 sites)	1789	136	1925
Kisumu (9 sites)	15818	2746	18564	Kisumu (9 sites)	6845	762	7607

Prevention of Mother-to-Child Transmission (PMTCT)

FACES supports 59 PMTCT sites in Migori, Rongo, and Kisumu East Districts, Nyanza Province, Western Kenya:

- In this reporting year, beginning October 2008, HIV counseling, testing, and results has reached 14,200 women, 15.9% of whom were HIV-positive and 80% have received ART prophylaxis to help prevent HIV transmission to their infant.

Voluntary Medical Male Circumcision

FACES supports Voluntary Medical Male Circumcision (VMMC) services to help prevent HIV infection. Services launched at Migori District Hospital in October 2008. Services have expanded to 4 facilities in all: 2 mobile clinics at Karungu and Muhura health centres in Migori District and to 1 static clinic in Rongo District at Rongo District Hospital. By 31 March 2009, over 1,500

VMMC services had been performed at these clinics.

FACES is a collaboration between the Kenya Medical Research Institute (KEMRI) and the University of California, San Francisco (UCSF). FACES partners with District Health Management teams (DHMTs), City Councils, non-governmental organizations (NGOs), faith-based organizations, and private health facilities to provide family-focused, comprehensive HIV services which include provider initiated counseling and testing (PITC), family planning, PMTCT, STI and TB screening and care, prevention with positives activities, counseling, nutritional and social support. To increase local capacity, FACES provides targeted trainings, close mentorship, and Continuing Medical Education (CME) activities. In addition, ***Uliza!*** Clinicians' HIV Hotline provides HIV consultations via cellular phone to health care providers in real time.

FACES is supported by

- U.S. President's Emergency Plan for AIDS Relief (PEPFAR)/Centers for Disease Control and Prevention (CDC)
- NIH – National Institute of Health
- Foundations
- Private Donations
