

FACES

Program Summary

Family AIDS Care and Education Services (FACES) is a family-focused, comprehensive HIV prevention, care, and treatment program with 62 supported HIV sites in Nyanza and Nairobi; 64 PPCT sites in Nyanza; and 17 male circumcision sites in Migori and Rongo in Nyanza Province. FACES initially launched with one HIV site in Nairobi in September 2004 and second site in Kisumu in March 2005.

HIV Care and Treatment

FACES supports 62 HIV service sites in Western Kenya and Nairobi

- 60 sites in Nyanza Province, Western Kenya and 2 in Nairobi.
- A summary of enrolment and sites per district is below in Table 1.

Table 1: Enrolment by District (31 Mar '10)

Cumulative	HIV Care		62 sites
	Adults	Peds	Total
Nairobi	4562	402	4964
Kisumu	20579	3878	24457
Rongo	7565	1806	9371
Migori	19048	3439	22487
Suba	17601	4176	21777
Nyanza Total	64793	13299	78092
Program Total	69355	13701	83056

Cumulative	ART		52 sites
	Adults	Peds	Total
Nairobi	2232	146	2378
Kisumu	9748	1260	11008
Rongo	2137	271	2408
Migori	6193	623	6816
Suba	6201	633	6834
Nyanza Total	24279	2787	27066
Program Total	26511	2933	29444

Current	HIV Care		62 sites
	Adults	Peds	Total
Nairobi	2434	205	2639
Kisumu	13091	2311	15402
Rongo	6755	1520	8275

Program Total	21362	2293	23655

Prevention of Parent-to-Child Transmission (PPCT)

FACES supports 64 PPCT sites in Migori, Rongo, and Kisumu East Districts, Nyanza Province, Western Kenya:

- In this reporting year, HIV counseling, testing, and results has reached 15,287 women, 15% of whom were HIV-positive. Over 97% of HIV+ women and their exposed infants have received ARV prophylaxis within antenatal and maternity services to help prevent HIV transmission to their infant (Oct '09 – Mar '10).

Voluntary Medical Male Circumcision (VMMC)

FACES supports Voluntary Medical Male Circumcision (VMMC) services to help prevent HIV infection. Adult and youth VMMC services launched with 1 site in Migori in October 2008 and

second site in Rongo by March 2009. VMMC services are now provided at 17 sites in Migori and Rongo. Infant VMMC started in Migori in June 2009. A total of 9,732 adult and youth male circumcisions and 72 infant male circumcisions have been performed (31 Mar '10).

FACES is a collaboration between the Kenya Medical Research Institute (KEMRI) and the University of California, San Francisco (UCSF). FACES partners with District Health Management teams (DHMTs), City Councils, non-governmental organizations (NGOs), faith-based organizations, and private health facilities to provide family-focused, comprehensive HIV services which include provider initiated counseling and testing (PITC), family planning, PMTCT, STI and TB screening and care, prevention with positives activities, counseling, nutritional and social support. To increase local capacity, FACES provides targeted trainings, close mentorship, and Continuing Medical Education (CME) activities. In addition, *Uliza!* Clinicians' HIV Hotline provides HIV consultations via cellular phone to health care providers in real time.

FACES is supported by

- U.S. President's Emergency Plan for AIDS Relief (PEPFAR)/Centers for Disease Control and Prevention (CDC)
- NIH – National Institute of Health
- Foundations
- Private Donations
