

FACES

Program Summary

Family AIDS Care and Education Services (FACES) is a family-focused, comprehensive HIV prevention, care, and treatment program with 62 supported HIV sites in Nyanza and Nairobi; 64 Prevention of Parent-to-Child Transmission (PPCT) sites in Nyanza; static and mobile Voluntary Medical Male Circumcision (VMMC) sites in Nyanza; and Provider Initiated Testing and Counseling sites in Nairobi and Nyanza. FACES initially launched with one HIV site in Nairobi in September 2004 and second site in Kisumu in March 2005.

HIV Care and Treatment

FACES supports 62 HIV service sites in Western Kenya and Nairobi with over 87,000 patients cumulatively enrolled and 31,780 patients cumulatively on ART.

- 60 sites in Nyanza Province, Western Kenya and 2 in Nairobi.
- A summary of enrolment and sites per district is below in Table 1.

Table 1: Enrolment by District (30 Jun '10)

HIV Care - ever	62 sites			ART - ever	53 sites		
	Adults	Peds	Total		Adults	Peds	Total
Nairobi	4656	409	5065	Nairobi	2304	171	2475
Kisumu	21403	4046	25449	Kisumu	10342	1211	11553
Rongo	8251	1892	10143	Rongo	2415	325	2740
Migori	20285	3759	24044	Migori	6879	708	7587
Suba	18492	4510	23002	Suba	6737	688	7425

Program Total	73087	14616	87703	Program Total	28677	3103	31780

Prevention of Parent-to-Child Transmission (PPCT)

FACES supports 64 PPCT sites in Migori, Rongo, and Kisumu East Districts, Nyanza Province, Western Kenya:

- During the last quarter, ending 6/10, HIV counseling, testing, and results has reached 7,444 women, 16% of whom were HIV-positive. Ninety-seven percent of HIV+ women and 94% of their exposed infants received ARV prophylaxis to help prevent HIV transmission to their infant.

Voluntary Medical Male Circumcision (VMMC)

FACES supports Voluntary Medical Male Circumcision (VMMC) services to help prevent HIV infection. Adult and youth VMMC services launched with 1 site in Migori in October 2008, a second site in Rongo by March 2009, and Infant VMMC started in Migori in June 2009. During the past quarter, ending 6/30, VMMC services reached 879 males, including 11 infants, at 11 sites: 575 males at 8 sites in Migori and 304 males at 3 sites in Rongo.

Provider Initiated Testing and Counseling (PITC)

FACES supports facility-based Provider Initiated Testing and Counseling (PITC) in Nairobi, Migori, Rongo, and Kisumu East Districts in Nairobi and Nyanza. During the past quarter, ending 6/30, PITC reached 9,087 patients (7,027 adults and 2,060 children), among which 18% were HIV positive (20% of adults and 12% of children).

FACES is a collaboration between the Kenya Medical Research Institute (KEMRI) and the University of California, San Francisco (UCSF). FACES partners with District Health Management teams (DHMTs), City Councils, non-governmental organizations (NGOs), faith-based organizations, and private health facilities to provide family-focused, comprehensive HIV services which include provider initiated counseling and testing (PITC), family planning, PMTCT, STI and TB screening and care, prevention with positives activities, counseling, nutritional and social support. To increase local capacity, FACES provides targeted trainings, close mentorship, and Continuing Medical Education (CME) activities. In addition, *Uliza!* Clinicians' HIV Hotline provides HIV consultations via cellular phone to health care providers in real time.

FACES is supported by

- U.S. President's Emergency Plan for AIDS Relief (PEPFAR)/Centers for Disease Control and Prevention (CDC)
- NIH – National Institute of Health
- Foundations
- Private Donations
