Nairobi

Patients Enrolled in Care by Gender

Note: Jan - Mar '07 data

Patients Currently on ART by Gender

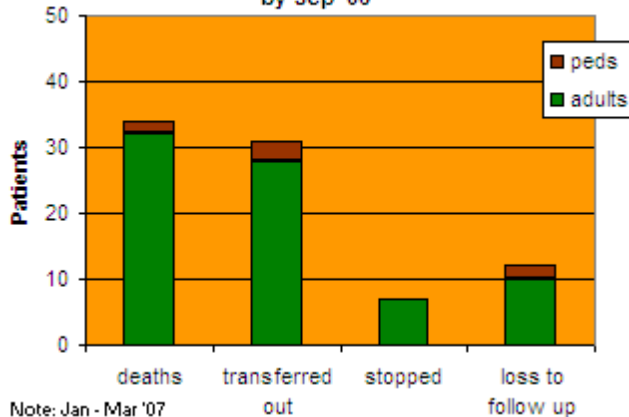

Note: Jan-Mar '07

ART Patients Discontinued/Lost to Follow-up Compared to Patient Ever Enrolled on ART

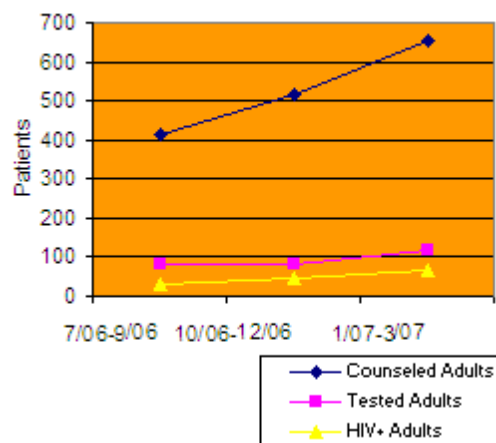

Discontinued ART by Reason by Sep '06

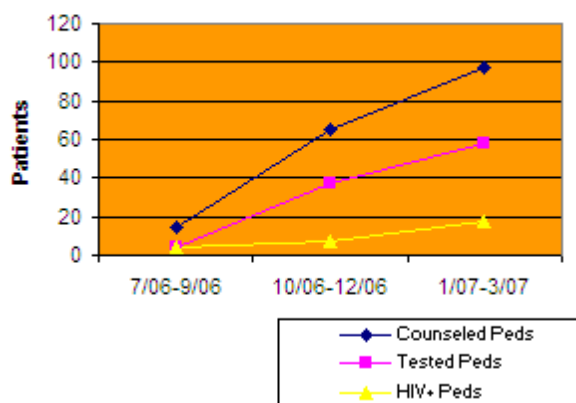

Note: Jan - Mar '07

Counseled & Tested for HIV (Adults)

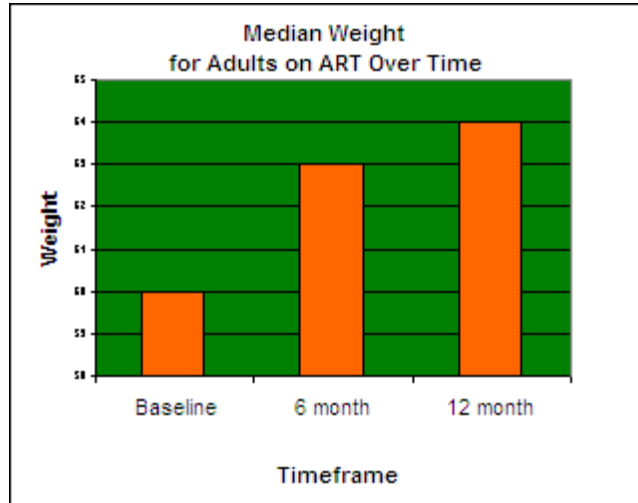

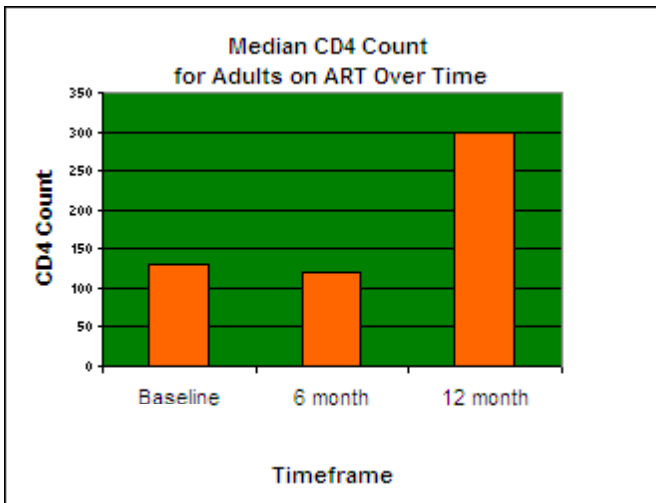

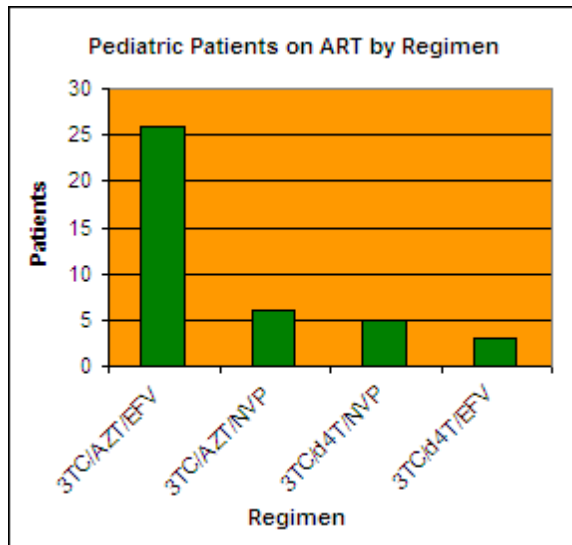

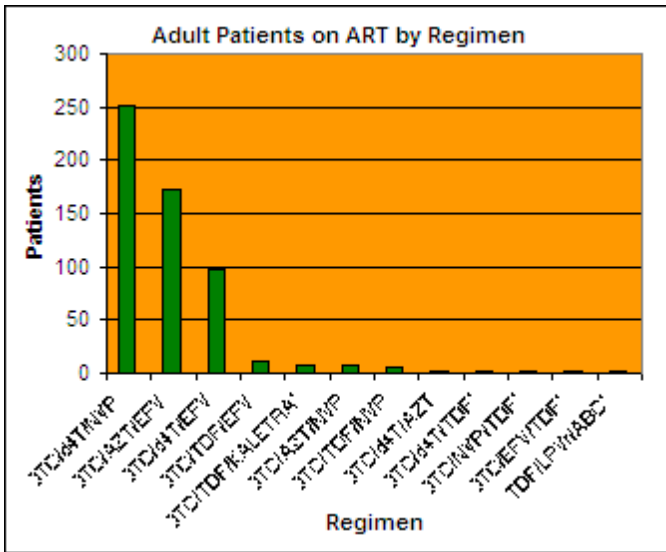

Counseled & Tested for HIV (children)

Nairobi

Effectiveness Outcomes (figures from an earlier quarter)

Note: 6 Months CD4 follow-up number (N=108 & N=13) is low due to lack of FACScount machine.

However once machine was acquired, 6 month CD4 counts became standard for all ART patients
